- Mechanical & Mechanical Engineering Tech

INTERN SUCCESS STORIES

HME, INC.
HAAS METAL ENGINEERING

JESSICA H.
HME Estimator (former intern)
KSU - CNS

"Interning at HME helped me put what I learned in school into real life situations. I loved going to the jobsites and seeing how the jobs I assisted in managing or estimating came together."

JOSH B.
HME Intern & Skilled Student
Washburn Tech - Drafting

"I enjoyed detailing the most. Creating structural 3D models really fascinates me and I have really enjoyed being able to draw up buildings this summer."

JOON H.
HME Intern & Skilled Student
KSU - CNS

"I enjoyed meeting new people and operating the PeddiAssembler. I also learned to use Tekla software for estimating."

JOEY H.
HME Intern & Skilled Student
KSU - Industrial Eng.

"What I enjoyed most about the internship is getting real-world experience. You can only learn so much in the classroom, so getting into a big manufacturing company is a game changer."

CHRISTIAN C.
HME Intern
KU - Mechanical Eng.

"I enjoyed the hands-on experience, especially in welding. Welding is also the thing I learned most about during my internship."

COLE D.
HME Intern
Missouri S&T - Mechanical Eng.

"I learned that you can't do everything by yourself and that working together with good communication makes everything run much smoother and efficiently."
